

PEARLARC TECHNOLOGY

ZOMODO has launched the exciting new PearlArc collection of sinks, faucets and accessories. Utilizing the latest cathodic arc surface treatment technologies, the ZOMODO products will be the highlight of your kitchen space. Perfect for modern open-plan living spaces.

03

SHOT-PEEN SURFACE HARDENING

Shot peening the stainless steel surface creates a harder more durable surface that is both scratch-resistant and impact-resistant. The mixed material pellets are fired into the stainless steel surface causing plastic deformation and hence compressive stress in the material.

TITANIUM OXIDE COATING

Commonly referred to as PVD, Titanium and Chrome Oxide Coating is a vapour deposition technique where solid titanium or chrome metal is vaporized in a high vacuum environment and deposited on to the sink surface as a pure metal coating. The process transfers the molecular level providing an extremely hardwearing coloured layer.

NANO RESIN COATING

Finally a nano-resin layer of hydrophobic active substance provides long lasting ultra-thin protection and a durable easy to clean surface effect.
